

Progress report 20200402

PokMan Ho

02-Apr-2020

Date Time: 02-Apr-2020 09:00

Location: Skype

People: James, Samraat, Emma, PokMan

1 Follow-up items

miscellaneous

2 Topics discussed

1. modified biocell model
2. variables introduced in latest biocell ODE system
3. differences and novelty of this biocell model compared to published models

3 Consensus

1. add frames around organism and its biomass component to show physical attachment but logical separation process in this model
2. make a comparison table between this biocell model & all available published models
3. find special features in this model compared to previous models
4. extract methods for published biocell models for carbon extraction in equations
